Notice to Bridge Builders. SEALED Proposals will be received at the Auditor's Office, of Montgomery county, Ohio, in Dayton, until 8 o'clock, A. N., en Saturday, August 6, 1859.

For the erection of a Bridge across the Miami River, at Carrotton, being near where the County Road leading from Carrotton west crosses said river.

Bids will be received for the maconry and superstructure, separate for the job complete.

First, and squestrections can be seen at the aforesaid office, where the condition of payments, &c., will be made inniven.

Bridge to be completed this fall.

By order of the County Commissioners.

PROF. BLOCK,

MANUPACTURER OF A NEWLY INVENTED AND Improved Spectacle,

RESPECTFULLY informs the Citizens of Phillips' Hall, (corner of Main and 2d street,) a little fatigued, the farmer and his city guess Paul F Thornton, Calhoun, Mo.

The regular degree of A M was conferred on the shade of a tree near the boun. Dayton and vicinity, that he has taken on Sunday, at helf past ten, A. M. and 8 P. M. halted under the shade of a tree near the boun.

The regular degree of A M was conferred on dary fence of a large field in which a fine crop members of former classes, and the honorary BRAZILIAN PEBBLES,

BRAZILIAN PEBBLES,
superior to any other in use. These glasses can be
used for the greatent length of time, either by day
or by night, with perfect length of time, either by day
or by night, with perfect case, when selected to suit
the state of the eyes, and never oxuses that giddiness of the head, unpleasant's mation to the eyes,
that many experience from using the common kind,
but lend to attengthen and improve the sight.

The spectacle lens in common use, termed deuble
convex, have but one focus, and that heing in the
centre. Now as the eyes, rolling from side to side,
depar- from this poin, it is afferted by the distortious incident; and occustons in weak eves, fatigue
and pain, and is strong eyes a more frequent change
of glass for those of higher power than is caused by
the simple flattening of the eye by age; or, to use
the language of many, the eye grow elder. Could
the glass be attached to the eye, so as to move with
it, or the head be made to turn and accommodate
the sight, while the eyes remain fixed, the double
convex tens would not be no objectionsh'e. But as
neither of those plans could be very well accompliched, an easier method to remedy this important
ulefect in alt hilherto constructed heips, to the defeative human vision is desirable. This end is obobvitaled, as they will emable the menter to perceive obvital at every angle of vision, with all the correctness of the natural healthy a git. All glasses sold by him will be scientifically adjusted by means of an Optimetro of his own avention.

Frof. Block's thorough knowledge of the Anatomy of the various Pathological changes of the human eye enables him not only to stapp glasses bestfitted to the different variations of sight, variation by merciy examining the eye, to select such as are most suitable. The eye being so delicate an organ, we cannot be too cantious in the selection of spectacles, as from their use may recuit the most desirable or deployable consequences. plorable consequences
The Processor will only remain for a few days.—
Therefore come at once and give me a call. 37-51w
